Sulaum

This is just a short article exposing a video game called Black Ops 2, and how it's connected to Zurgauwe/Zarqawi

The game was released in 2012, but the in-game story takes place in two different times, the 1980s, and the year ***2025***

The main villain of this game is a man from Nicaragua by the name of ***Raul Menendez*** who is being hunted by the US military

Menendez is first intercepted in the late 1980s, but is later ***"killed"*** during a mission

Menendez's "Death"

https://www.youtube.com/watch?v=Sjo85S0nIPM

After this, it skips to the year 2025, where the militaries of the world all have advanced technologies

What's interesting is that in this part, the US and China are said to be in a "Second Cold War", and a cyberattack hits China's Stock Exchange, but the cyberattack is actually ***from Menendez***, but China blames it on the US

This is actually interesting because I remember ***last year (2025)*** when the news was reporting on Trump doing crazy things like tremendously increasing tariffs on China. Obviously US and China are controlled by the same people, but this occurrence was done deliberately

> The trade conflict between the US and China escalated significantly in 2025, a period covered in the China–United States trade war and Tariffs in the second Trump administration Wikipedia articles. The year was defined by a drastic initial hike in duties, a tit-for-tat retaliatory tariff spiral that sent tariffs to peaks of 145% (US) and 125% (China), the closure of the '$800 *de minimis* exemption', and an eventual 90-day truce and framework agreement. Wikipedia +4

Menendez ***is still alive*** but he's actually the head of a group called ***Cordis Die.***

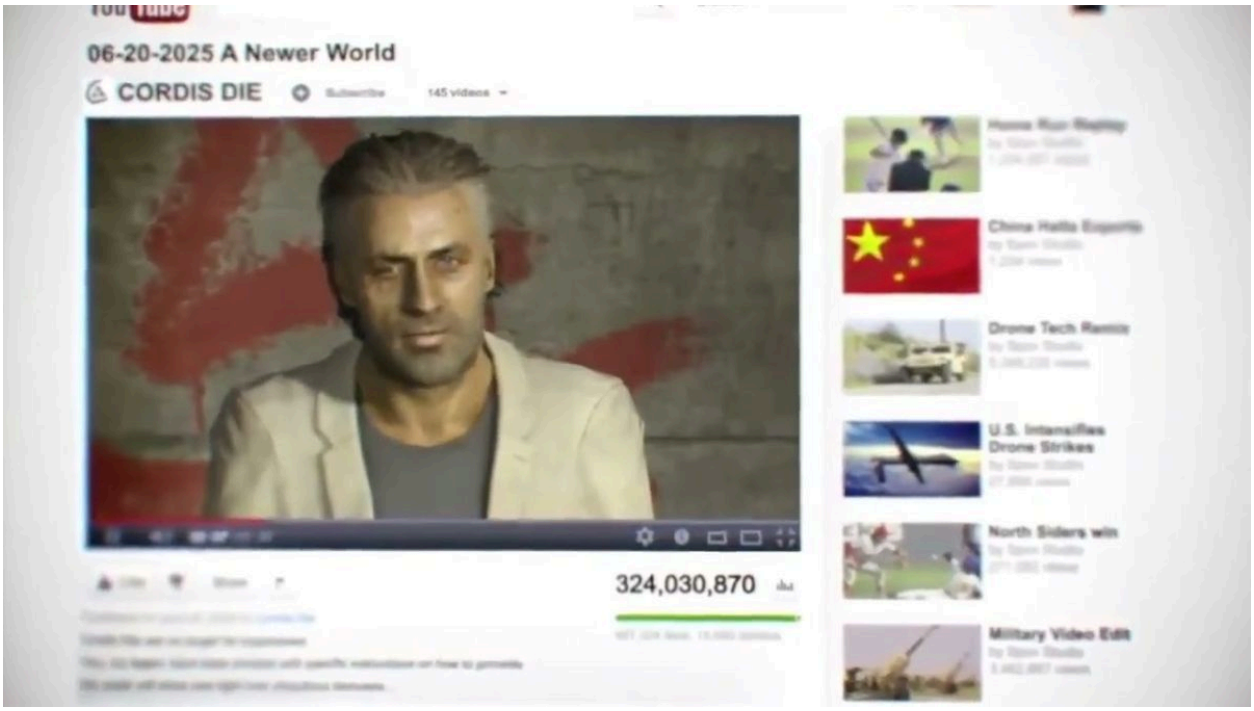
Looks similar to ***Antifa***

What's interesting is that Menendez doesn't actually show his face, but he communicates online, and anonymously under the name ***Odysseus***

Odysseus (Menendez) is seen as a ***"Messiah for the 99%"***

Young people tend to be more liberal in the west, and more supportive of the Palestinians

Menendez shows his face eventually on ***YouTube!***



Date = 20/06/2025

Menendez/Odysseus was **61** or **60** years old

Raul Menendez was **61 years old** during the 2025 events of *Call of Duty: Black Ops II*.

Born on September 5, 1963, his age was exactly 61 during the canonical climax of the game, including his actions during the missions "Odysseus" and his eventual death on June 19, 2025. Villains Wiki +1

Muhdee/Mahdi = **60** Years old - **Ketaub ul-Fetaun**

١٠٧٥ – حدثنا الحكم بن نافع عن جراح عن أرطاة قال المهدي ابن ستين سنة

Menendez even has an army of Yemeni fighters in Yemen!

As Zakah1 explained, Sanaa Yemen is the original Mukkuh/Makkah, which the Muhdee/Mahdi will rise from

You see Menendez really is symbolic of Zurgauwe/Zarqawi, but I believe the plan was to make him reveal himself on the internet (YouTube) in 2025, but it did not happen

What's interesting is that in the latest Black Ops 7, Menendez is said to still be alive, but the game actually takes place in the Year ***2035***.

Blind in one eye = Dujjaul Symbolism

So this may be another plan to make him rise ***9 or 10*** years from now.

But he ***won't*** rise ***then***, rather it will be ***before***

Freemasons think that they've altered prophecy by removing Assad but have prevented the Sofyaunee/Sufyani from rising.

But now they want to fulfill the prophecy of the army of black banners being weakened and destroyed in Shaum and Egypt.

This is why they are behind the smooth relations between Turkey and Armenia.

They want the border opened because this is the first sign that the black banners will have major differences with each other

When this happens, the so called Hezbollah will be sent to fight and destroy them, with the exception of a few, in particular Shoayb ebn Sauleh

Freemasons think they can do all of this without having Zurgauwe rise shortly after because they think prophecy can be altered

They don't understand that them trying to alter prophecy **IS PART OF PROPHECY**
